IMPROVE DIABETES OUTCOMES

Diabetes Self-Management Education and Support (DSMES): Ongoing process of facilitating the knowledge, skill, and ability necessary for diabetes self-care. Includes activities that assist in implementing and sustaining the behaviors needed to manage diabetes.

60%

of people with diabetes have never received formal diabetes selfmanagement education and support (DSMES).

AADE 16

Everyone with diabetes needs DSMES, but especially at these four critical times:

- 1 At diagnosis
- 2 Annual assessment of education, nutrition and emotional needs
- 3 When new complicating factors influence selfmanagement
- 4 When transitions in care occur

Diabetes education helps your patients make better self-management decisions

Taking Medication

Problem Solving (for hypo/hyperglycemia and sick days)

Reducing Risks (for acute and chronic complications)

Evidence shows diabetes education:

Decreases A1C

Reduces hospital admissions and readmissions

Improves medication adherence

Increases healthful eating patterns and regular activity

Increases selfefficacy and empowerment

Improves quality of life

Improves coping

More likely to use primary care and preventive services or follow-up on treatment recommendations

21% reduction in diabetes-related death

14% reduction in MI

37% reduction in microvascular complications

Reduced healthcare costs

A diabetes educator:

- is a licensed health care professional with training and experience pertinent to DSMES
- educates on diabetes
- provides ongoing support in diabetes self-care
- evaluates progress and communicates with providers

How do I refer a patient?

Find diabetes education services in your area in the Kentucky Diabetes Resource Directory: https://prd.chfs.ky.gov/KYDiabetesResources/

A referral may be required for insurance reimbursement.
